Post or fax
Please complete the registration form overleaf and return with payment.

Join your fellow alumni and friends at the Western NSW Alumni Cocktail Reception hosted at the historic homestead ‘Knocklong’ by Sue Johnson (BA ’72, DipEd ’73, GradCert ’06, MA ’08).

The evening includes music, canapés, beverages and a talk by internationally-renowned researcher and author Mark Adams (BSc ’79, PhD ’84 Melb).

Don’t miss this opportunity to reconnect with your fellow University of Sydney alumni and meet new friends in the area.

Topic: Feeding the Planet

The world will need to double its food production by 2050 to keep up with a growing human population. This will have to be achieved using limited natural resources like water, more efficiently. Professor Adams will discuss the Faculty’s research expertise in ‘Feeding the Planet’ using a multidisciplinary approach and tackling food production and security at every level of the system.

Join us in Dubbo with Fred Watson AM
on Thursday 18 March:
“Space Tourism: The Final Frontier”
